Claims 1-5 and 10

The subject matters of claims 1-5 and 10 do not appear to involve an inventive step in view of documents 1-3.

Document 1 describes that stereophonic sounds are made into monaural sounds and sent to the L

earphone, and telephone sounds to the \bar{R} earphone.

Document 2 or 3 describes a television set having two systems: the function of receiving broadcasts and that of telephone communication, and a person skilled in the art could have easily conceived of the idea of adopting the sound-output processing by two systems described in document 1 for the sound-output processing of the said television set and constituting the said television set so that the sounds received through the function of receiving broadcasts and those through the function of telephone communication can be output.

Claims 6-9

The subject matters of claims 6-9 do not appear to involve an inventive step in view of documents 1-3. Document 2 or 3 describes that the images received through the function of receiving broadcasts and those through the function of telephone communication are both shown.
